The CyberStrong Platform

Automated, Intelligent Cybersecurity Compliance and Risk Management

CyberStrong Makes Monitoring and Managing Cybersecurity Programs Easy

CyberStrong empowers managed service providers to take charge of their clients' cybersecurity posture and increase visibility across their entire client portfolio from one central location. Help clients prioritize remediation efforts and track all clients progress, assessment updates, and client gaps from a single-source-of-truth.

"As a services provider performing assessments across highly regulated industries, choosing a risk management platform that fulfilled our needs, reduced complexity and had the quickest time to value was key for us.

We use CyberStrong for our clients' assessments, to manage their risk posture, and to manage effective paths to remediation. We offer more value, differentiate our offering against the competition, and have access to more business."

- Ivan Del Campo, CEO of Skyline Infosec, CyberStrong Partner
